

Top 10 Priciest Security Vulnerabilities Exposed.

[DOWNLOAD INFOGRAPHIC](#)

Cybersecurity costs businesses billions. By 2021, global cybercrime is expected to grow to a whopping \$6 trillion a year. The National Cyber Security Alliance states that 60 percent of hacked SMBs go out of business within six months of an attack.

Employee error costs companies \$3.77+ million a year. Ransomware? \$1 billion. What's causing it? What's behind these attacks?

Check out our free infographic and discover 10 of the most financially devastating vulnerabilities your customers are facing every day, such as:

- What's behind 60% of all cyber attacks
- What is the top security concern for CIOs
- The hourly costs behind a Distributed Denial-of-Service (DDoS) Attack

IoT Endpoints
Estimated Cost: **a minute**

Bring Your Own Device (BYOD)
Estimated Cost: **\$26.4 million** annually (avg. mobile malware infections)

Important Security
Estimated Cost: **\$7 million** annually (for IoT data breaches)
